The price of cream has gone up from 40 to 50 cents a quart, the increase taking effect with the increase in the retail price of milk from five to six cents. The farmers who now supply the milk dealers will be the next to increase the price of their milk, because the great cost is said to be in feed and care of the stable and milking the cows. The deer paid not the slightest attention to what was going on at the station and the ultimate arrival of the train did not disturb them in the least.

There was a time and not many years ago, either, when every farmer of any consequence had from one to three yokes of oxen, but now these strong but slow going beasts have been almost entirely replaced by horses. The yoke seen Monday were nice Holsteins and are owned by George Emerson, who lives near the junction.
